

**There are places where foaming is acceptable...**

**but not in your amine towers!**

**SigmaPure™ from MPR Services is the first real answer to amine process foaming problems.**

**It's new! It works!**

**With SigmaPure chemicals are not needed to control foaming!**

**SigmaPure, provided exclusively by MPR Services:**

- Removes foam precursors while the system is running via a slip stream
- Eliminates additives, pretreatments and disposables (filters or carbon)
- Works on either the Lean or Rich side and most amine systems
- Minimal waste generation

**SigmaPure is the practical and consistent solution to amine process foaming!**

Call your MPR representative now for a timely assessment, onsite foam testing, and a quote tailored to your plant's needs.
